

Grading Policy:

Grading will be based on the correctness and efficiency of your program algorithms. Below are some details about the grading policy. We will use two different test cases for testing the correctness of your programs. The test cases and the expected results can be found on Canvas.

- Correct Implementation and execution: 60%
 - Each command correctness:10%
- Compatibility with project description:10%
- Efficiency:10%
- Report, comment and readability: 20%
